

Winter 2022-23

Stormwater Management Pond / GCL Liner Deployment

QEW/Port Credit Improvement Project - MTO

Bentofix SRNWL – our most robust GCL for winter deployment

Winter 2021-22

GCL advantage over other geoliners:

- *General Contractor used its own crews.*
- *No need to hire outside forces and/or hire a subcontractor.*
- *Terrafix provided initial supervision and required MTO engineering submittals.*
